

Standard Coating Specifications

All steel surfaces shall be pre-treated with an iron phosphate corrosion inhibitor and finished with an abrasion graffiti resistant *Polymer Powder Coating* cured to ensure a tough and durable finish. All surfaces shall meet or exceed a salt spray resistance of 1/8" creepage from scribe according to ASTM B117.

Ultra Abrasion and Graffiti Resistant Coating Specifications

All steel surfaces shall be pre-treated with an iron phosphate corrosion inhibitor and finished with an *ULTRA Abrasion and Graffiti Resistant Polymer Powder Coating* cured to ensure a tough and durable finish. Abrasion resistance meets ASTM D3363 4H rating. All surfaces shall meet or exceed a salt spray resistance of 1/8" creepage from scribe according to ASTM B117.

Graffiti Free Cleaner

Graffiti free cleaner will remove in seconds virtually all marker and ink stains from surfaces painted with General Storage Systems' ULTRA Graffiti Resistant Polymer Powder Coating when applied following directions on the bottle.

Designer Color Choices

Due to the printing process and the effects of light heat and age, samples on this chart may vary slightly in color or gloss from the actual finished product. If any exact match is important, please request a powder coated panel.

Premium Color Choices

- Color premium applies.
- AG Ultra abrasion and graffiti resistant powder coating standard (no upcharge).
- Ultra abrasion and graffiti resistant powder coating available in all standard colors for an upcharge.
